

Our young and innovative company is looking with immediate effect or by agreement for a

Mobile Developer (iPhone/iPad)

Key responsibilities: in this function you will design and develop, with innovative ideas, specific software applications.

The company: With over 4000 customers **coresystems** is not only the world's leading provider of AddOn solutions for SAP Business One but also a global active SAP SSP Gold Partner. Our customers are internationally located SAP Business One Channel Partners and large corporations with smaller branches which are looking for a stand-ardized and fully integrated ERP solution fitting to their requirements.

Our innovative **coresuite** apps extend the functionality of the SAP Business One ERP and provide additional value to our partners and their customers. The apps can be integrated with low-cost, zero consulting or programming knowledge and are easy to use. You will find apps that cover areas of e-commerce, reporting, dashboards, time recording, service solutions, integration of social network as well as many Apps for mobile devices such as iPhone.

Personal requirements:

- Good understanding of Objective-C
- Experience with iPhone development
- Architectural understanding of iPhone applications
- Good knowledge of Apple development tools like Xcode, iPhone Simulator
- Creative and innovative problem-solving skills
- Experience in designing user interfaces related to usability and design
- Ideally one or more years in a professional frontend objective-c development role or at least a huge interest in learning it

Next to these requirements we expect an employee between 20 and 40 years old who is ready to work independently, in a team and also under pressure.

We offer an ambitious, varied job with high independence and own initiative. There is a nice spirit and ambiance of the young **coresystems** staff. Also we offer attractive conditions of employment.
