coresystems®

Our young and innovative company is looking with immediate effect or by agreement for a

J2EE developer

Key responsibilities: In this function you will work in a challenging software project (coresuite cloud) as Java developer. Bring in your knowledge and use state of the art technologies and tools. Be a part of all the lifecycles of a project (requirements engineering, software design, development, testing ...). Also be part of a scrum team and bring in your ideas. Keep up to date with the latest Java technologies and frameworks.

The company: With over 4000 customers **core**systems is not only the world's leading provider of AddOn solutions for SAP Business One but also a global active SAP SSP Gold Partner. Our customers are internationally located SAP Business One Channel Partners and large corporations with smaller branches which are looking for a standardized and fully integrated ERP solution fitting to their requirements.

Our innovative **core**suite apps extend the functionality of the SAP Business One ERP and provide additional value to our partners and their customers. The apps can be integrated with low-cost, zero consulting or programming knowledge and are easy to use. You will find apps that cover areas of e-commerce, reporting, dashboards, time recording, service solutions, integration of social network as well as many Apps for mobile devices such as iPhone.

Personal requirements:

- Experience in developing J2EE applications (incl. lifecycle)
- Very good skills in Java and J2EE
- JEE platforms like JBoss, Tomcat and Apache
- Hibernate framework
- Current protocols (SOAP, Json, XML, ...)
- Current technologies like WebServices, REST, Servlets
- SQL and SQL Server (MSSQL, PostgreSQL)
- Object oriented design notation (UML)
- Basic web technologies (html, javascript)
- Maven
- Very good English know-how

Next to these requirements we expect an employee between 20 and 30 years old who is ready to work independently, in a team and also under pressure.

We offer an ambitious, varied job with high independence and own initiative. There is a nice spirit and ambiance of the young **core**systems staff. Also we offer attractive conditions of employment.
